

## Negative Code

*Negatives are words and/or phrases that mean **no** or **not**. For example, **nobody** means **no person**. Common negative words and phrases include: no, not, nobody, never, nothing, no one, nowhere, none, cannot, isn't, didn't, won't, wasn't and any other contraction with **n't**.*

*Adjectives can often be made negative by adding **un-** to the word.*

A spy has just sent you a list of instructions. The code is that all the positives must be changed in to negatives for the orders to be understood. Can you crack the code?

1. Let everyone find out the secret.
2. The friends have found out our plans.
3. They are very happy about it.
4. They know where we are going to do it, but they don't know how.
5. I think we should do it anyway.

**Extension Task:** Can you write your own note in negative code?
